India Vet Care Expo

Where Animal Health is Transformed

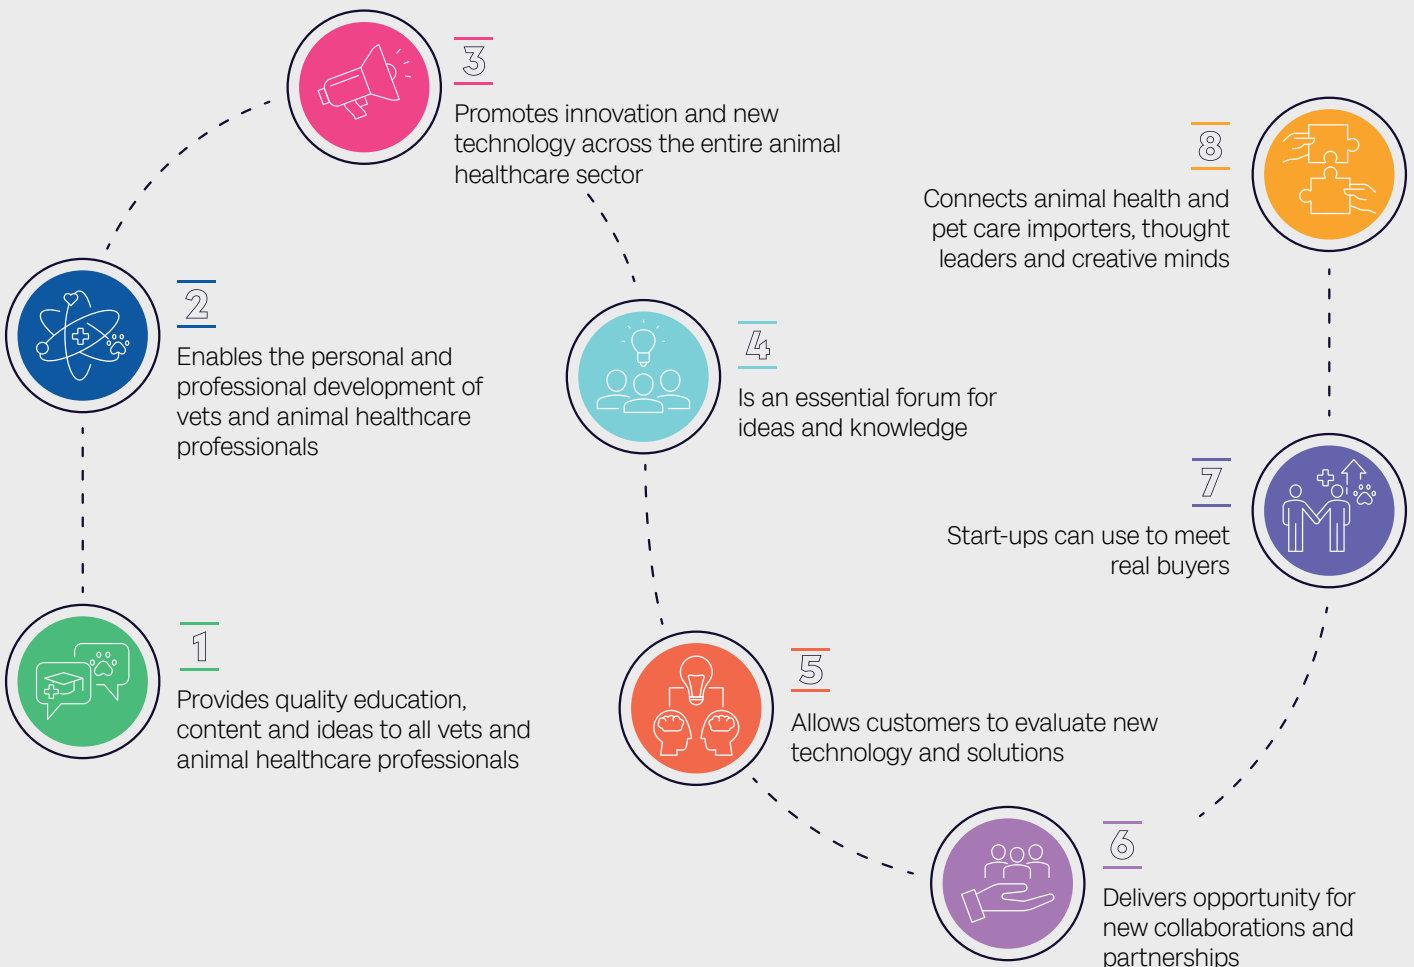

Welcome to India's new, international style, all in one business-&-learning-excon, designed to:

- Help buyers find, compare and buy new technology, products and services
- Help veterinarians and animal health professionals keep abreast of change
- Help solution providers engage with VET practice owners and animal health professionals
- Help manufacturers, importers and distributors of pet care and pettech products connect with vet clinics, pet store owners and retailers

Like every industry, animal health is changing: the humanization of pets is now a leading trend; the demand for livestock and poultry production is constantly escalating; controlling disease and sustainability of wildlife resources is top of mind; and the development of ground breaking research has become a core focus.

The India Vet Care Expo is an in person B2B event designed to connect buyers to sellers who wish to learn more about the latest technology, products and services in the veterinarian, animal health, pet care and pettech industries. The India Vet Care Expo showcases disruptors who promise clinical excellence and operational innovation with the services they provide to buyers.

An event that unites all stakeholders – vets and veterinary specialists, veterinary nurses, animal technologists and technicians, commercial farmers, breeders, researchers, wildlife parks, associations and peak bodies, suppliers and solution providers, government, start-ups and innovators.

Who Attends?

The India Vet Care Expo unites buyers (veterinarians including Food and Animal Vets, as well as Wild Life & Companion-animal Vets) who are looking to meet, find, compare and buy new products and services from industry sellers.

Attendee Group

 Vets in Practice	 Companion Animal Veterinarians	 Food and Animal Veterinarians	<h3>Job Titles</h3> <ul style="list-style-type: none">✓ Veterinarians✓ Veterinary Technicians✓ Animal Health Researchers✓ Veterinary Clinic Teams✓ Veterinary Nurses✓ Scientists✓ Veterinary Medicine Students✓ Veterinary Faculty✓ Animal Health Faculty✓ Veterinary Medicine Faculty✓ Animal Welfare Advocates✓ Animal Rights Activists✓ Veterinary Societies & Associations✓ Animal Health Companies and organizations✓ Government officials & Policymakers Involved in Animal Health Regulation✓ Agriculture & livestock industry professionals✓ Non-governmental organizations (NGOs) involved in animal health and welfare✓ Animal Shelter & Rescue Organization Workers✓ Importer / Distributor / Sourcing Personnel
 Vet Care Supply and Retail	 Research and Laboratories	 Government, Regulators, Public Health	
 Zoos, Animal Sanctuaries, Wild Life Conservation Parks	 Animal Farming and Agri Business	 Distributors and Sourcing Personnel	

Why Exhibit?

This is a world class experience that allows solution providers with new thinking and new products to engage with a prequalified audience that is hungry for innovation. With a large customer base attending the event, **The India Vet Care Expo** optimizes your budget and your time.

Every aspect of the exhibition has been designed for you to achieve maximum value and brand presence.

JOIN 150+ EXHIBITORS PARTICIPATING IN THE VET EXPO.

 Build Brand Awareness Visibility	 Launch New Products	 Source New Sales Leads	 Showcase Thought leadership	 Close Deals	 Peer-to-Peer Networking

The VetPet Health Summit

29-30-31 August 2024

Session 1 : Animal Health

Animal health encompasses the well-being of animals—physical, mental, and social. It's vital for livestock, pets, preventing zoonotic diseases, and ethical treatment. This session highlights the latest research, prevention, and treatments in animal health. Experts from veterinary medicine and related fields will discuss current status and future developments.

Session 2 : Animal Vaccination

Animal vaccines are vital for safeguarding the health of domestic and farm animals in India. The government's new policy focuses on immunizing livestock against diseases like Brucellosis, Foot & Mouth Disease, Avian Influenza, African Swine Fever, and Porcine Reproductive and Respiratory Syndrome Virus. However, challenges like infrastructure, storage costs, and a shortage of skilled professionals persist. This session highlights the importance of animal vaccination and explores solutions to these challenges.

Session 3 : Animal Diagnostics

The global veterinary diagnostics market is set to reach \$6.5 billion by 2025. Factors include a growing animal population, pet adoption, and increased healthcare costs. Improved diagnostics are crucial for better disease understanding and animal health worldwide. The market's growth is expected to continue, driven by cost reduction and a rising demand for targeted therapies. Discover the future of animal diagnostics and growth opportunities in India.

Session 4 : Veterinary Radiology

Veterinary radiology employs imaging technologies like radiography, ultrasonography, CT, and MRI to diagnose and treat conditions in animals. Digital radiography, ultrasound, CT, and nuclear medicine are gaining significance, with ongoing research promising future advancements in veterinary medicine.

Session 5 : Veterinary Parasitology

Veterinary Parasitology explores the relationship between parasites and animal hosts, including domestic and wildlife species. Through research and various methods, it diagnoses, treats, and prevents animal parasites, benefiting both animal husbandry and public health. This session focuses on recent research in epidemiology, disease treatment, and prevention strategies for parasitic infections in domestic and wild animals, promoting advancements in the field.

Session 6 : Animal Dermatology

Veterinary dermatology extends beyond treating rashes, encompassing diverse skin diseases across species. Specialists require expertise in various treatments and training in internal medicine, immunology, and allergies, as skin issues can often relate to underlying health problems.

Session 7 : Veterinary Dentistry

Veterinary Dentistry focuses on animal dental care, notably addressing periodontal disease, a common issue in dogs and cats. Early prevention is crucial, as even young pets can develop this condition. Unfortunately, dental pain often goes unnoticed. The veterinary dental equipment market, worth \$306 million in 2022, is projected to reach \$537.5 million by 2032, growing at a 5.8% CAGR from 2023. Explore the latest developments in veterinary dentistry and their adoption in the Indian market.

Session 8 : Zoonotic & Infectious Diseases

Zoonoses are infectious diseases that transfer from animals to humans, often involving bacteria, viruses, or parasites. Transmission can occur through direct contact, contaminated food, water, or the environment. With our close ties to animals in agriculture, as pets, and in the wild, zoonoses pose a significant global public health challenge.

Session 9 : Animal Microbiology

Animal Microbiology examines diseases caused by microorganisms like viruses, fungi, and bacteria in animals. Ensuring microbial safety in animals is vital, as they provide food and products for human consumption, and some microorganisms can transmit diseases between animals and humans. Veterinary microbiologists research disease-causing microorganisms in lab settings, playing a critical role in safeguarding public health. This session will spotlight recent developments in veterinary microbiology research, emphasizing microbial interactions and disease mechanisms.

Session 10 : Veterinary Telemedicine

Telemedicine, a facet of telehealth, enables the electronic exchange of medical data to improve animal health. It enhances communication, diagnostics, treatments, and client education. Practitioners must adhere to local veterinary laws. In India, telemedicine is evolving, offering untapped potential. Challenges include regulatory hurdles and technology access. Strategies like streamlined regulations and broader access can drive its growth.

Session 11 : Veterinary Clinical Pharmacology

Veterinary pharmacology delves into drug effects, safety, efficacy, and dosages in animals. It plays a pivotal role in animal research, drug development, and safety testing. Key areas encompass analgesics, antibiotics, antifungals, anti-parasitic drugs, and vaccines.

Session 12 : Animal Nutrition

In India, animals are cherished as family members, emphasizing the importance of a nutritionally balanced diet for their longevity and well-being. Factors like taste, smell, and learned eating habits also influence their diet. The best feed maintains optimal body weight and overall condition, fortifying the immune and digestive systems.

Session 13 : Animal Husbandry

Animal husbandry encompasses the care, breeding, and management of domestic animals for various purposes, including food, by-products, work, and companionship. This session delves into recent advancements, challenges, and sustainable practices in animal husbandry.

Session 14 : Emergency & Critical Care

Veterinary emergency and critical care specialists excel in high-pressure situations, delivering rapid, life-saving care to injured or critically ill animals. In India, the emergency medicine scenario is evolving, requiring steps like improved infrastructure, training, and awareness to strengthen it further.

Session 15 : Technology transforming Veterinary Healthcare

Emerging digital tools and technologies are revolutionizing veterinary medicine, bolstering prediction, prevention, monitoring, diagnosis, and treatment. Innovations like Wearable Medical Devices, 3D Printing, Telemedicine, Telehealth, and Big Data are transforming the field.

Session 16 : Anesthesia & Analgesia

Anesthesia and analgesia are pivotal in veterinary care, enhancing animal welfare and medical advancements. With evolving monitoring technology, we aim to reduce risks during anesthesia, improving outcomes.

Session 17 : Pet Animal Management & Healthcare

Pet animal management and healthcare encompass strategies for the well-being of domestic animals like dogs, cats, birds, and small mammals. It includes vet check-ups, vaccinations, parasite control, and treatment.

Session 18 : Ethics & Animal Welfare

Ethics and animal welfare are intertwined, focusing on moral principles and the well-being of animals. This session delves into the ethical challenges in ensuring humane treatment and meeting animals' basic needs.

KEY TAKEAWAYS FROM THE SUMMIT 2024

COMPANION

- Advanced surgical procedures
- Next-gen vaccines
- Quality of life – the options and do they work
- Animal behavior and anxiety management

LIVESTOCK

- Mobile sensors to monitor health and increase productivity
- Alternatives to antibiotics – getting more from your medicine cabinet
- Herd level health – how to plan, prevent, protect

WILDLIFE

- Stabilization and anesthesia for acute abdominal emergency
- Taking your post mortem skills from good to great
- Best practice for wildlife darting, capture and relocation

EQUINE

- What's new in managing India horse sickness
- Tips and tricks for dealing with complicated wounds
- Modern methods to manage musculoskeletal injuries to reduce mortality

PETCARE PRODUCTS

- Source new pet care and pettech products to stock in your clinics
- Discover what pet owners really want and how you can increase profits by selling more pet care

INNOVATION ARENA

- The vibrant arena hosting exciting demonstration of first-world technology specifically adapted to the variety of unique challenges that vets and animal health professionals face in India.

BUSINESS

- Arming vets with telemedicine apps
- How to generate revenue from veterinary nurse
- Make sure you are insured – the do's, don'ts and absolute essentials
- Recruit staff
- Finance your business

ANIMAL HEALTH

- Devices, real time data and the internet: enabling the farmers and breeders
- Why good medicine leads to good business the importance of preventatives
- How and when to intervene in feeding

Overviews of SDLC Symposiums

Organised by:

SDLC
Sustainable Development
Leaders Council

About The Organiser

About Organiser: Sustainable Development Leaders Council (SDLC) is a not for profit organisation that works in the area of planet friendly initiatives like Sustainable Development, Clean Energy Transition, Green Supply Chains, Sustainable Agriculture, Green Infrastructure & Equitable Growth... We do so by building networking opportunities for leaders in the space to meet, share ideas on doing business responsibly and transferring best practice in the process.
